Summary

Empathic Teaching: Promoting Social Justice in the Contemporary Classroom is written for those who are committed to employing social justice practices in the classroom. The intent is to educate the next generation to value tolerance and to have respect and empathy for others in society. While this tome will largely focus on understanding the role that equity should play in P-12 education, it will do so with an acute awareness that there are myriad factors that influence student engagement and the motivation to learn. Although some of the subjects under consideration have been written about elsewhere broadly, this tome will offer a unique contribution by examining each from a social equity perspective. As schools move to ensure a more inclusive and well-rounded student body, this book will be a substantial asset to anyone interested in advancing a social justice agenda.
